## NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

### Records Schedules; Availability and Request for Comments

**AGENCY:** National Archives and Records Administration, Office of Records Administration.

**ACTION:** Notice of availability of proposed records schedules; request for comments.

**SUMMARY:** The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 USC 3303a(a).

**DATES:** Request for copies must be received in writing on or before March 27, 1995. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

**ADDRESSES:** Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, College Park, MD 20740. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in the parentheses immediately after the name of the requesting agency.

**SUPPLEMENTARY INFORMATION:** Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency

records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivision requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

**Robert M. Bernero,**

*Director, Office of Nuclear Material Safety and Safeguards.*

**Introduction**

By Petition dated July 5, 1994 (Petition), Dennis Dums, on behalf of the Wisconsin Citizen's Utility Board

(Petitioner), filed a request pursuant to 10 C.F.R. 2.206 that the U.S. Nuclear Regulatory Commission (NRC): (1) Determine the applicability of 10 C.F.R. 72.48 to 10 C.F.R. Part 72 Subparts K and L; (2) determine whether Entergy Operations, Inc. (Entergy) is in violation of any NRC regulations regarding use of 10 C.F.R. 72.48 to make modifications to the VSC-24 cask for use at Arkansas Nuclear One (ANO); (3) order ANO to cease using 10 C.F.R. 72.48 until NRC determines whether or not it is applicable; (4) order Sierra Nuclear Corporation (SNC) to cease construction of VSC-24 casks for use at ANO that are being constructed based on ANO's 10 C.F.R. 72.48 evaluation.

By letter to Mr. Dennis Dums, dated August 16, 1994, I acknowledged receipt of the Petition. Notice of receipt was published in the **Federal Register** on August 24, 1994 (59 FR 43594). For the reasons given below, I have now concluded that the Petitioner's request should be granted in part and denied in part.

**Background**

The Petitioner submitted its July 5, 1994, request to NRC in connection with an earlier letter to NRC dated June 2, 1994, from Entergy, an NRC licensee under 10 CFR part 50, which operates ANO Units 1 and 2 near Russellville, Arkansas. In its June 2 letter, Entergy had briefly described its plans for spent nuclear fuel storage at ANO, involving use of the VSC-24 dry cask, in accordance with the general license of 10 CFR Part 72, Subpart K. Entergy had also stated in the June 2 letter that its use of the VSC-24 would involve minor changes to the cask design. According to Entergy's July 2 letter, the specific changes involved lengthening the approximately eighteen foot VSC-24 by about 11 inches in order to accommodate the slightly longer ANO Unit 2 fuel.

The June 2 letter went on to advise NRC of Entergy's conclusions that section 72.48 of the Commission's regulations applied to the changes Entergy proposed to make to the cask for use at ANO. It was this statement by Entergy regarding the applicability of 72.48 that apparently prompted the Petition that is the subject of this decision.

Section 72.48 of the Commission's regulations covers "Changes, tests, and experiments" that may be made by the "holder of a license issued under this part" without prior Commission
